FEATURES	AMW	Fixed 5G Carriers
Fiber Optic Internet Solution *AMW fiber is available in every unit, ensuring you have dedicated speeds without sharing. Our fiber internet is symmetrical, always-on and fast (up to 1 Gig!), making it ideal for gamers, working from home, and all streaming needs in between.*	✓	
Fixed 5G Internet Solution *With Fixed 5G, the top tier plan has a typical download speed of 85-250Mbps and upload speed of 10-20Mbps. Lower tier plans have typical download speeds of 50-85Mbps and upload speeds of 5-10Mbps. Customers pay for speed variations. Read the fine print for the details.*		✓
NO Credit Check	✓	
NO Network Congestion *Much like traffic on the roads, when cell towers are busy, there is no fast lane.*	✓	
NO Late Fees	✓	
99.9% Network Reliability	✓	
NO Additional Fees The price you see is the price you pay!	✓	
NO Speed Throttling *Cell towers use network steering, so speeds for heavy users and during times of congestion will be slower than usual speeds. There is no speed throttling with AMW.*	✓	
True to Speed Tiers *Uploading is used for everything from streaming video calls to file and photo sharing in the cloud. If you are a heavy user, or in times of congestion, speeds may be throttled (slower than usual).*	✓	
Local Support Teams	✓	
Minnesota Based Company	✓	
Managed WiFi	✓	✓
